

## *Lucas Parklands:*

*Ian & Lee Lucas*

*A search for a setting to combine the beauty of music, gardens and rainforest.*

*The potential of our property was immediately evident but no garden or natural environment can be in balance whilst infested with lantana and our land was being strangled.*

*We were aware of a creek, rock formations, waterfalls large and small that sprayed water in the wet season and a thousand other delights. All this on our thirty acres!!*

*The property was named Lucas Parklands in anticipation of what we could create.*

*The lantana was pulled out by the roots piece by piece. It revealed its secrets, figs, cycads, palms and many plants we didn't recognise.*

*Whilst constructing our first music room we began the job of transferring our land into the park we dreamt it could be.*

*Now the garden is under control we devote our energy into creating a second music room of a quality suited to attract both international artists and the younger professional performer. We will build a studio in which to record their music.*

*It's our intention to maintain the balance of our rainforest, protect our special ecosystem whilst providing a beautiful venue for artists and guests to enjoy. The Hinterland environment and its artistic mindset is an ideal location.*

## **“Jazz in June”**
